☐ Thokar naiz baig
Lahore, Pakistan

As a React Frontend Developer with one year of professional experience, I possess a strong command of React.js and its ecosystem. I have successfully collaborated on the development of interactive and user-friendly web applications using React components, state management libraries, and modern frontend tools. With a solid understanding of HTML, CSS, and JavaScript, I have effectively translated design concepts into pixel-perfect and responsive user interfaces. Throughout my experience, I have gained proficiency in leveraging RESTful APIs and integrating them seamlessly into React applications. I am well-versed in frontend development best practices, including code optimization, performance enhancements, and browser compatibility. Proven ability to translate designs and wireframes into high-quality code, and write application interface code via Javascript and ReactJS workflows

☐ Strengths & Skills

✔ basics of devops	✔ Bootstrap	✔ CSS
✔ Git	✔ Front End	✔ Fire base
✔ HTML	✔ JavaScript	✔ github
✔ React	✔ On page seo	✔ Redux

☐ Projects

neoreach

https://ranaazhar0.github.io/neoreacht-app/

Neoreach is a fully animated HTML and CSS theme that brings your website to life with captivating and dynamic animations. This theme is designed to make your web pages visually stunning and engaging, leaving a lasting impact on your visitors.

With Neoreach, you can incorporate animated elements throughout your website, such as scrolling effects, hover animations, and transitions between sections. These animations add a sense of interactivity and fluidity to your site, creating an immersive browsing experience.

pro-app

https://ranaazhar0.github.io/-my-pro-app/

By using javascript jquery html css fully responsive mobile website
By leveraging JavaScript, jQuery, HTML, and CSS, you can create a fully responsive mobile website that adapts seamlessly to different screen sizes and devices.

Gion

https://github.com/RanaAzhar0/moblie-theme/settings/pages

The Gion theme is built using HTML and CSS, making it easy to customize and modify according to specific branding requirements. It provides a solid foundation for creating mobile-friendly websites,

react from validation

https://ranaazhar0.github.io/signin-signup/

by using react tailwind react-from-validation
The SignIn SignUp Form API for a shopping website allows users to create new accounts or sign in to existing ones. It enables the website to manage user authentication and authorization.
The Add to Cart function allows users to select items they want to purchase and add them to their shopping cart. This feature enables users to collect multiple products for a single purchase transaction.

wine shope

https://ranaazhar0.github.io/wine-shope/

wine shop theme making it easy to customize and modify according to specific branding requirements. Have onScroll functionalities
